- Roadmap to Grow Bright TV viewership

OBJECTIVE: GROWING THE SUBSCRIPTION BASE IN A DATA-DRIVEN ERA

CEO OBJECTIVE

"To aggressively grow BrightTV's subscription base for this financial year through targeted Customer Value Management (CVM) initiatives."

1.User & Usage Trends: **Identifying who is watching, where they are, and how they engage.**

2.Consumption Factors: **Understanding the key drivers that influence platform activity.**

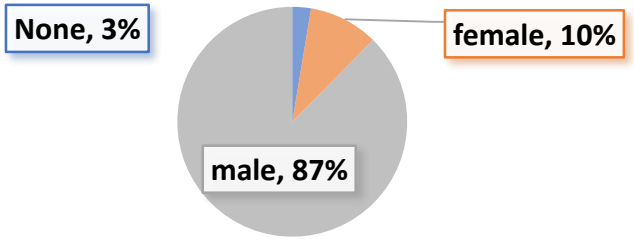
3.Churn & Stickiness: **Analyzing session depth to improve retention and viewer loyalty.**

4.Growth Initiatives: **Recommending actionable steps to broaden the audience and deepen engagement.**

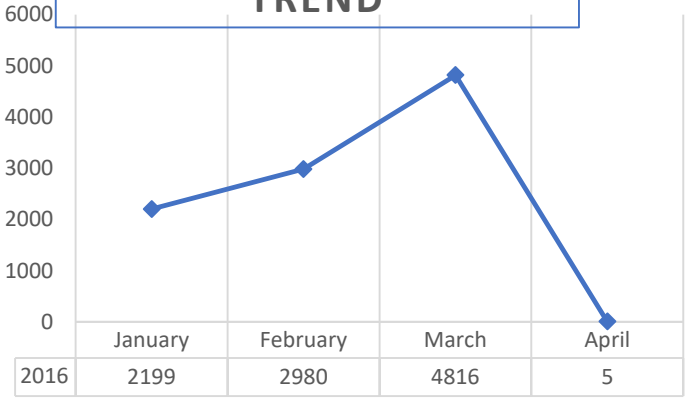
KEY PERFORMANCE INDICATORS: 10,000 SESSIONS AND 1,000 ACTIVE USERS ANALYZED

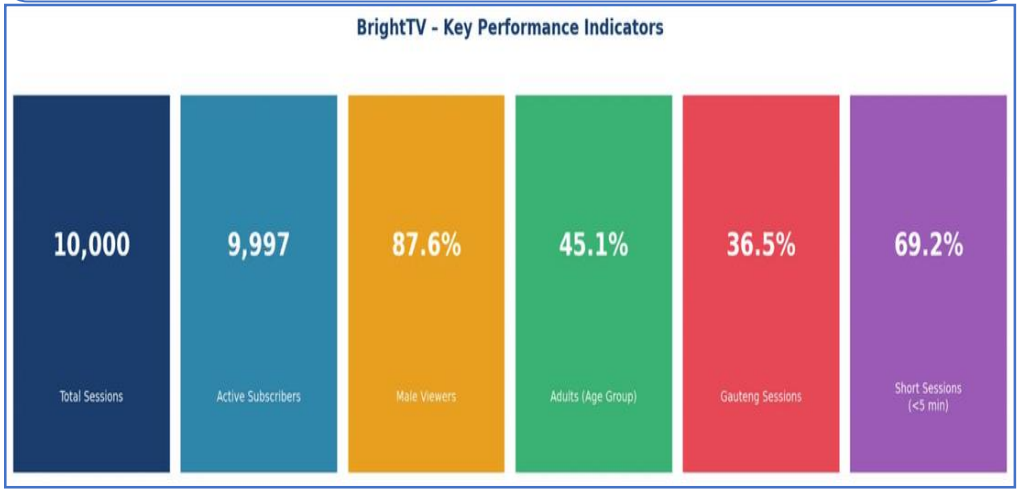
VIEWERSHIP KPI (Jan-Apr 2016)	
Month	
January	2199
February	2980
March	4816
April	5
Grand Total	10000

GENDER CONTRIBUTION

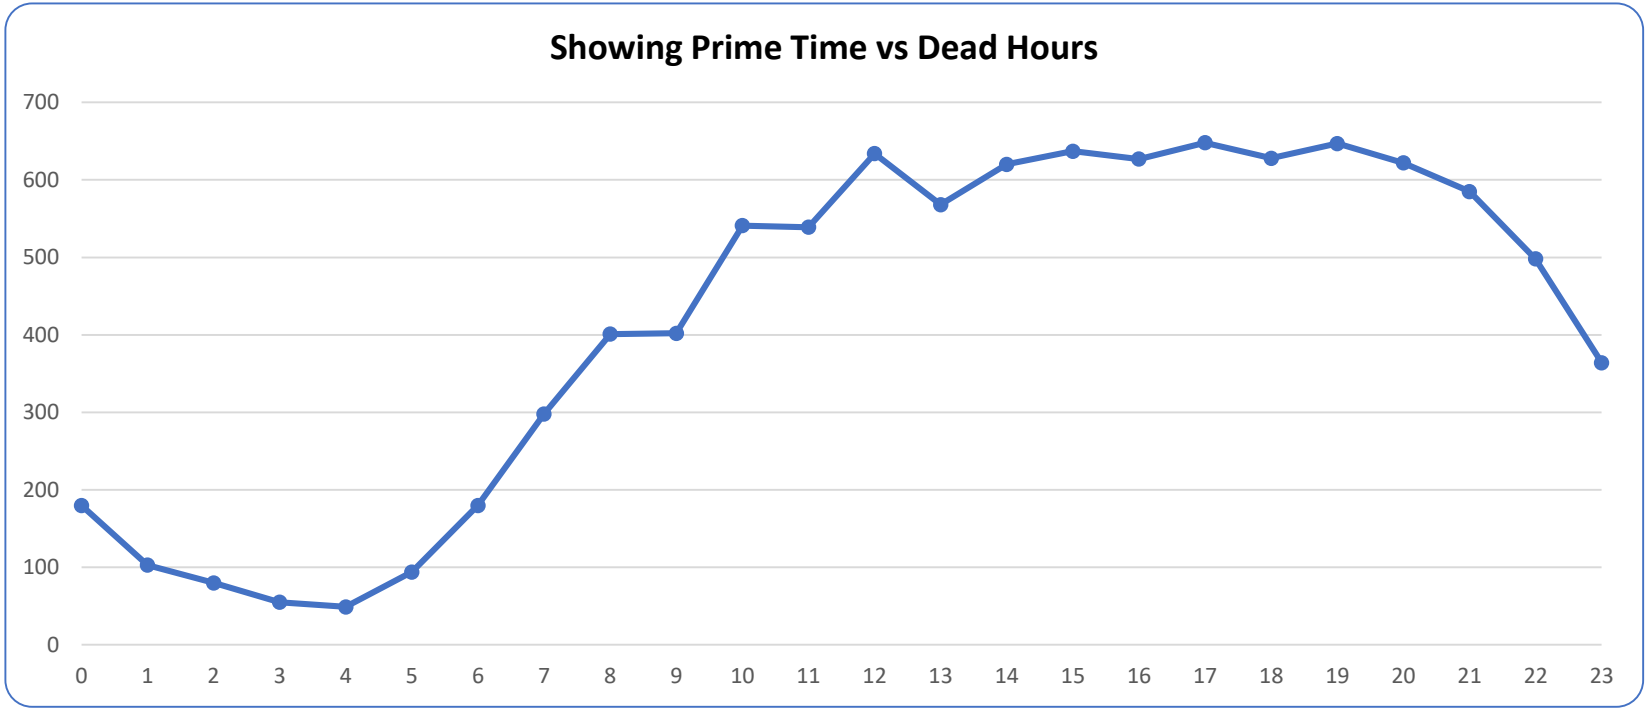


OVERALL CONSUMPTION TREND





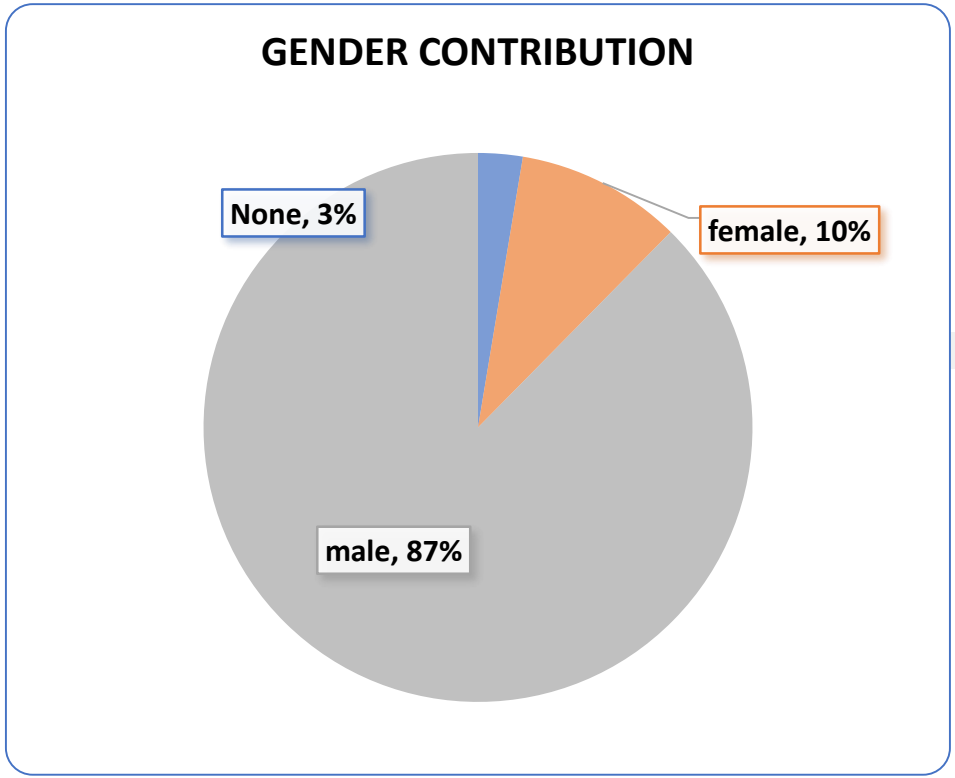
VIEWING BY 2 HOURS INTERVALS



- **This shows hourly viewing behavior.**
- **We typically see strong peaks in the evening, which represent prime engagement periods**

87.6% MALE SKEW AND ADULT DOMINANCE HIGHLIGHT MAJOR GROWTH GAPS

Gender Distribution



THE GENDER GAP

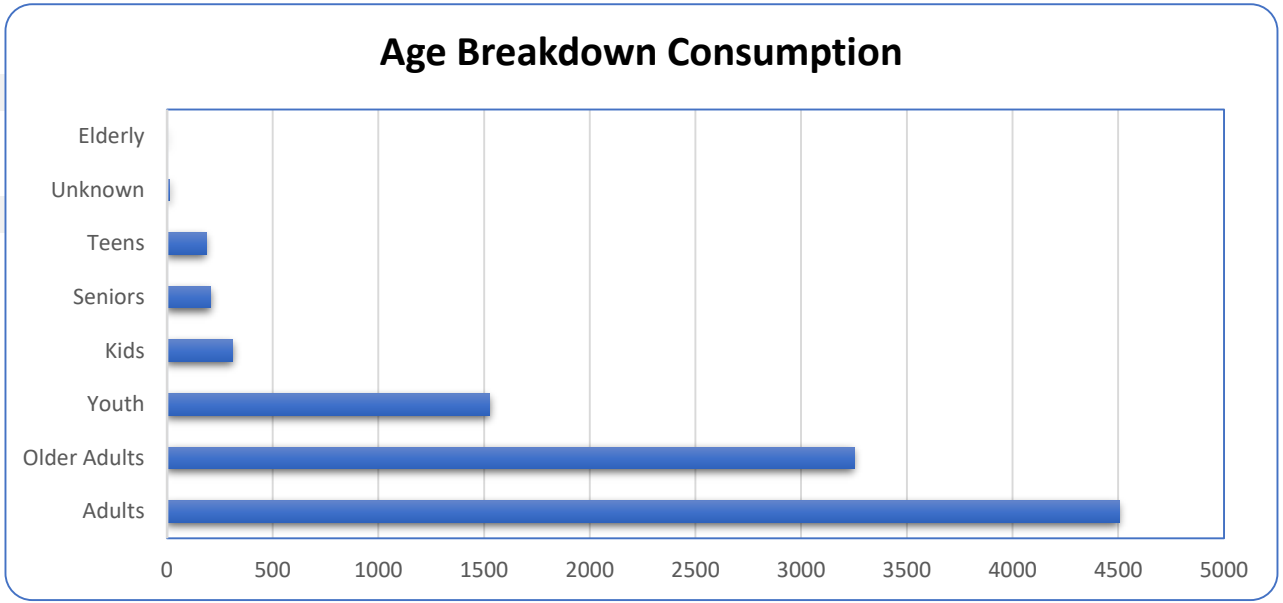
The overwhelming **87.6% male skew** indicates that BrightTV is currently a male-centric platform. The **9.8% female share** represents the single largest acquisition opportunity for the CVM team.

MALE =8,761 (87.6%)

FEMALE =977 (9.8%)

AGE GROUP BREAKDOWN VIEWERSHIP

Age Group Distribution



Adults (25–44)	45.1%
Older Adults (45–64)	32.5%
Youth (18–24)	15.3%

THE YOUTH OPPORTUNITY

While **77.6% of users are over 25**, the **15.3% youth segment** is underserved. Capturing the "digital native" demographic is essential for long-term subscription sustainability.

GAUTENG AND WESTERN CAPE DRIVE 55% OF PLATFORM ENGAGEMENT

TOP PROVINCES BY SESSIONS

Gauteng	3,654 (36.5%)
Western Cape	1,845 (18.5%)
KwaZulu-Natal	1,001 (10.0%)

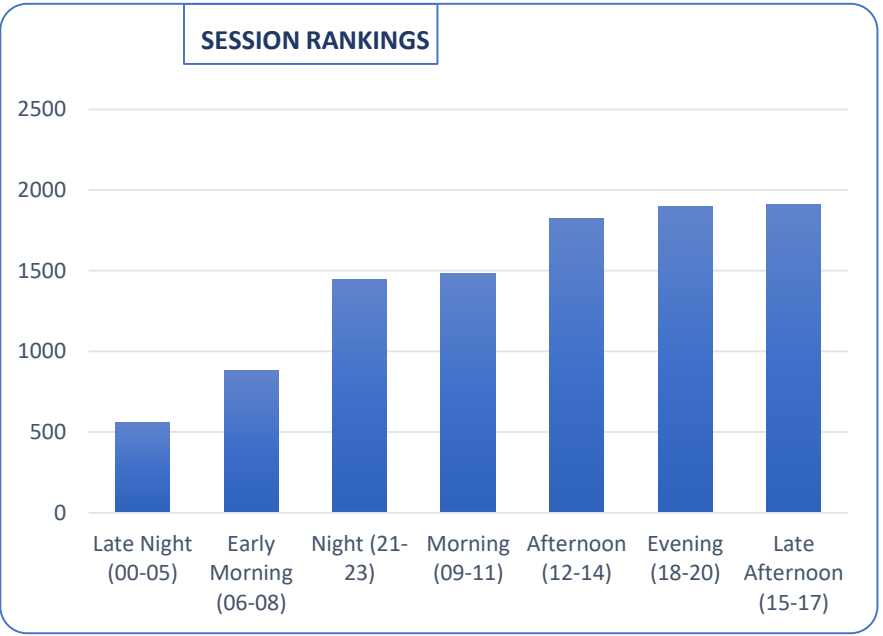
Urban Concentration: Over half of all sessions originate from South Africa's two primary economic hubs.

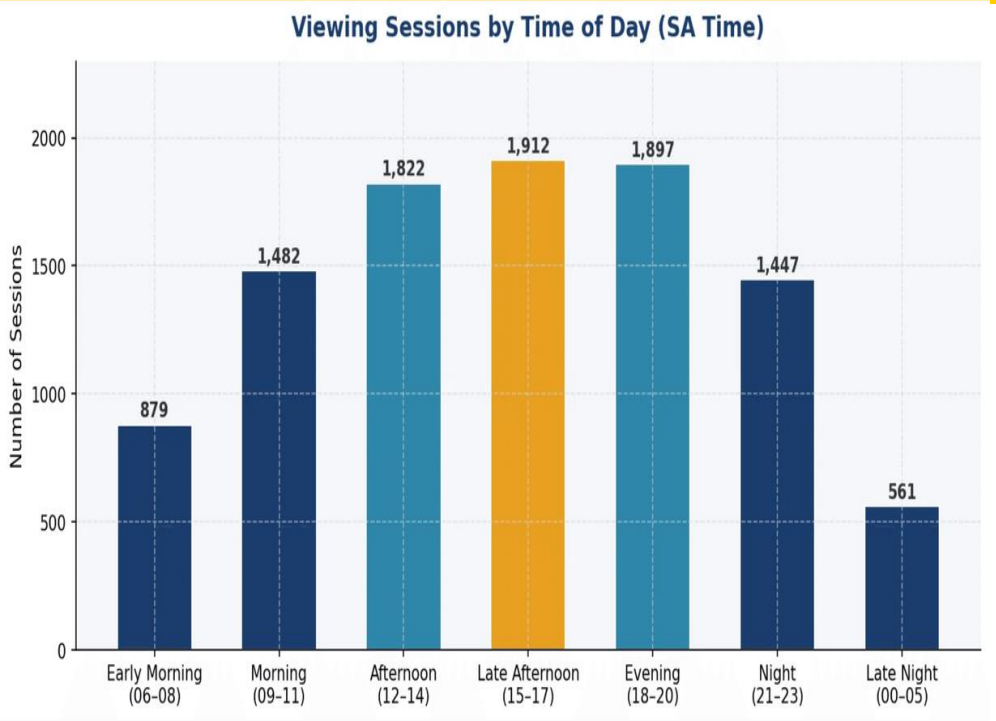
Growth Gap: Rural provinces like Northern Cape and Free State show minimal engagement, representing a significant acquisition opportunity.

VIEWERSHIP PER PROVINCE

	Northern Cape	None	Free State	North West	Eastern Cape	Limpopo	Mpumalanga	Kwazulu Natal	Western Cape	Gauteng
Total	230	263	292	344	690	763	918	1001	1845	3654

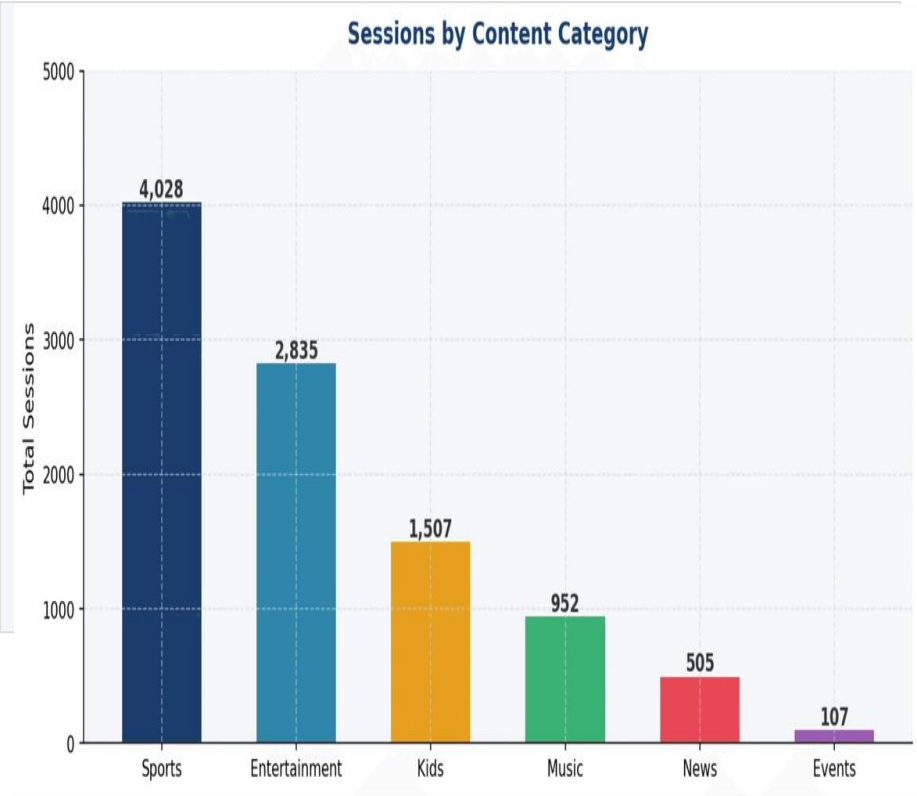
GAUTENG AND WESTERN CAPE DRIVE 55% OF PLATFORM ENGAGEMENT





This simplifies viewing into time-of-day segments.
It confirms when users are most active and where engagement is lowest. In this case its at late night
Content preferences vary by time
We need to align programming with the user habits in order to grow

PRIME TIME VIEWING PEAKS AT 15:00–20:00 SA TIME



THE PRIME TIME WINDOW

Engagement surges between **15:00 and 20:00**, accounting for nearly **40% of daily sessions**. This aligns with post-work and school routines in South Africa.

CONTENT AFFINITY

Sports and Entertainment dominate the prime-time slots. Live events, particularly major sports tournaments, act as the primary catalyst for appointment viewing and platform stickiness.

STRATEGIC INSIGHT

Low consumption in early morning (00:00-05:00) suggests an opportunity for automated content loops or "catch-up" highlights to maintain background engagement.

SPORTS CONTENT DRIVES 40% OF ALL SESSIONS: THE POWER OF LIVE EVENTS

SESSIONS BY CATEGORY

Sports	40.3%
Music	20.1%
Entertainment	15.4%
Kids	12.2%
News	12.0%

TOP PERFORMING CHANNELS

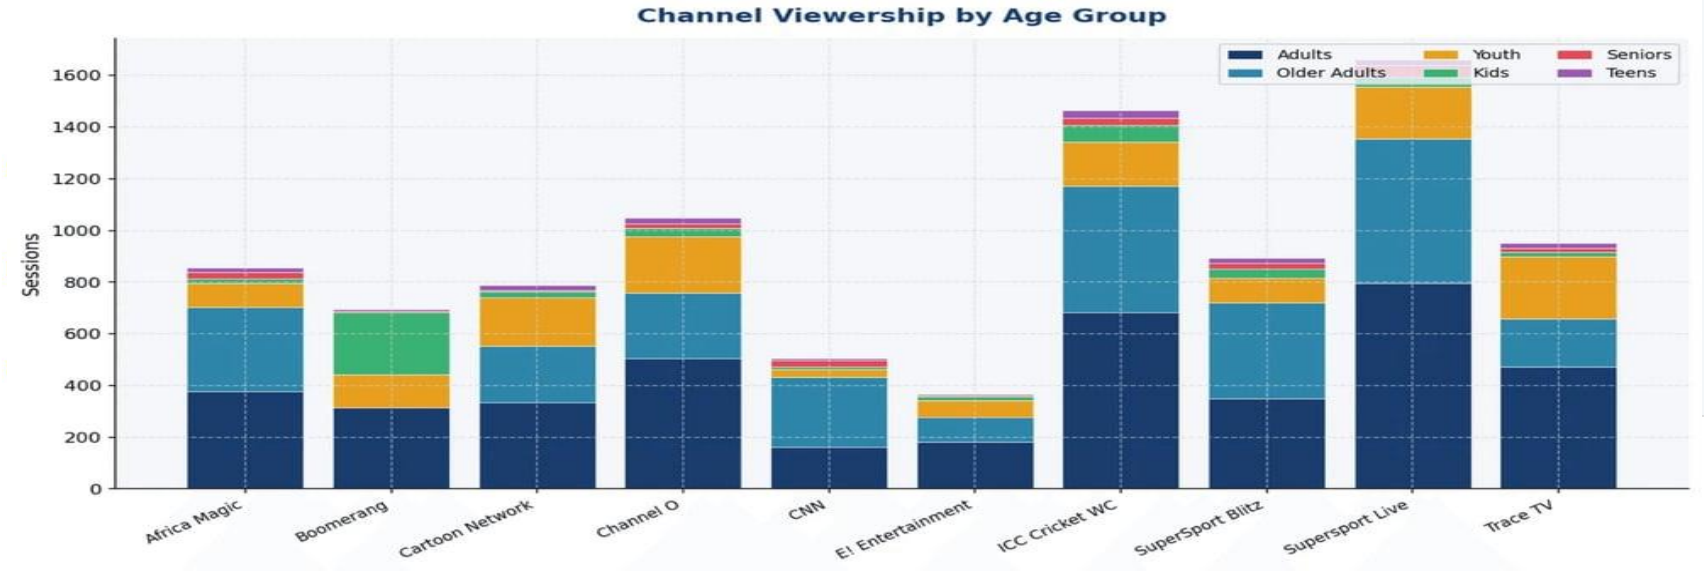
SuperSport Live Events	1,662 Sessions
ICC Cricket World Cup 2011	1,465 Sessions
Channel O	1,050 Sessions
Trace TV	952 Sessions

STRATEGIC INSIGHT

Live sports events are the single most powerful engagement catalyst. The ICC Cricket World Cup alone generated 14.6% of total sessions, proving that "appointment viewing" is critical for retention.

69% SHORT-SESSION RATE INDICATES A HIGH RISK OF CHURN AND LOW STICKINESS

69.2% SESSIONS UNDER 5 MINUTES



'Surf-Only' Behavior: 6,918 out of 10,000 sessions are extremely short, suggesting viewers are browsing rather than consuming content.

Retention Warning: Low session depth is a leading indicator of **subscriber churn**. Only 7.6% of sessions exceed 30 minutes.

Age-Content Mismatch: As shown in the chart, certain age groups lack high-affinity content, leading to rapid exits from the platform.

CVM PRIORITY: IMPLEMENT "CONTINUE WATCHING" AND AI-DRIVEN DISCOVERY TO CONVERT SURFERS INTO VIEWERS.

FOUR PRIMARY DRIVERS OF CONSUMPTION: TIME, AGE, GEOGRAPHY, AND LIVE EVENTS

01 TIME OF DAY

The **15:00–20:00 window** is the primary driver of volume, capturing 38.1% of sessions. Consumption is dictated by South African work and school schedules.

02 AGE PROFILE

Adults (25-44) drive the most consistent engagement. Youth segments show high affinity for music, while older adults prefer news and sports.

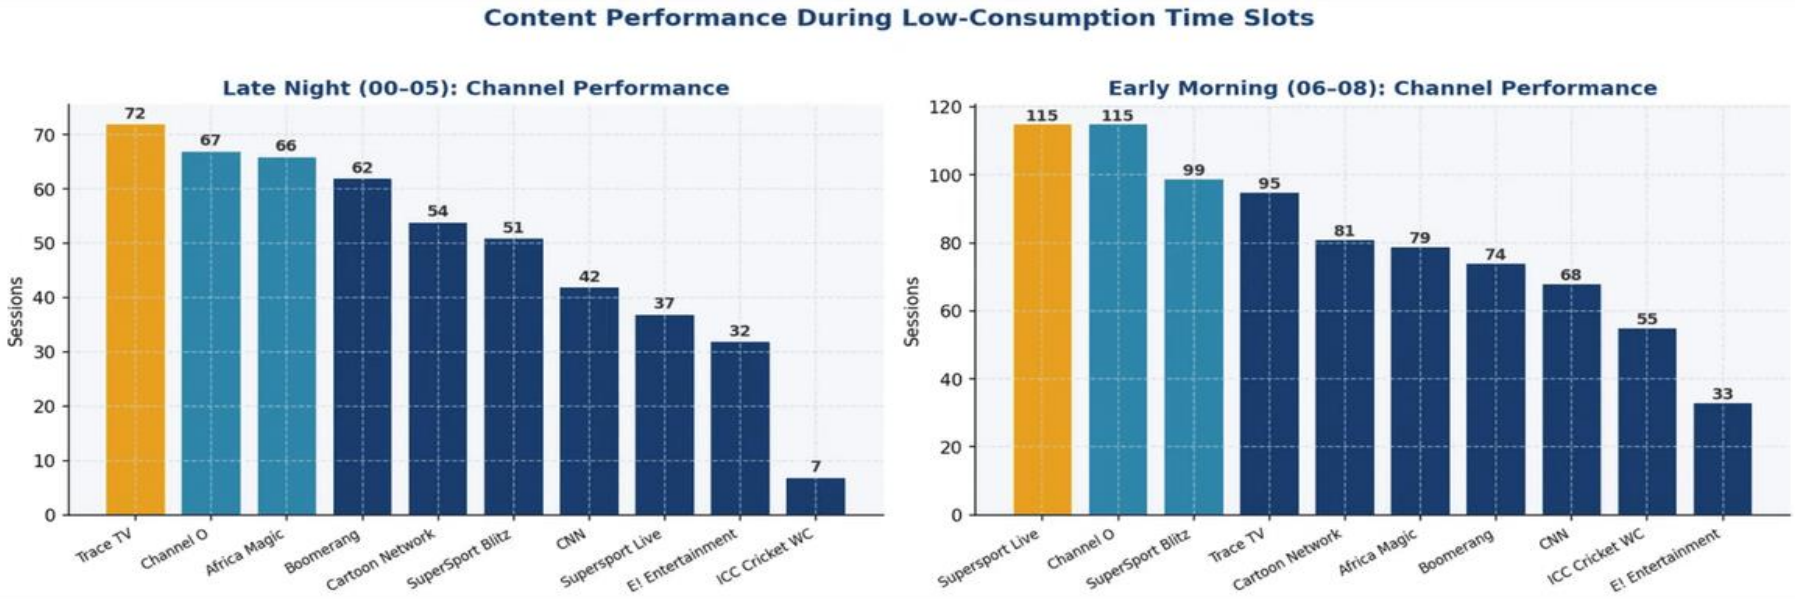
03 GEOGRAPHY

Gauteng and Western Cape account for 55% of engagement. High urban density and better connectivity are key enablers of platform usage.

04 LIVE EVENTS

Live Sports (e.g., ICC Cricket World Cup) create massive spikes in engagement, acting as the ultimate "appointment viewing" catalyst for the platform.

STRATEGIC CONTENT ANCHORS FOR LATE-NIGHT AND EARLY-MORNING SLOTS



LATE NIGHT (00:00–05:00) STRATEGY

Music Anchors: Leverage Trace TV and Channel O for automated music blocks targeting background viewers.

Animation Marathons: Utilize Boomerang and Cartoon Network for overnight family-friendly loops.

CVM GOAL: CONVERT OFF-PEAK HOURS INTO "PASSIVE ENGAGEMENT" WINDOWS TO REDUCE DAILY CHURN.

EARLY MORNING (06:00–08:00) STRATEGY

Sports Briefings: Expand SuperSport Blitz with daily morning news and highlight reels.

Lifestyle & Wellness: Introduce morning workout and wellness content for the early-riser demographic.

SIX BUSINESS INSIGHTS TO ACCELERATE ACQUISITION AND RETENTION

01

FEMALE AUDIENCE EXPANSION

Address the 9.8% female viewership gap by investing in drama series, reality TV, and lifestyle programming. Drive acquisition through targeted social media campaigns.

02

YOUTH & DIGITAL ENGAGEMENT

Engage the underserved 17.2% youth/teen segment by introducing short-form content, gaming integrations, and partnering with local influencers.

03

RURAL PROVINCE PENETRATION

Expand in underserved provinces (e.g., Northern Cape, Free State) by introducing affordable entry-level tiers and data-light, mobile-first streaming options.

04

LIVE SPORTS RIGHTS EXPANSION

Capitalise on sports driving 40.3% of sessions. Securing additional live rights (PSL, Springbok rugby) is the single most powerful subscriber acquisition tool.

05

PERSONALISATION & DISCOVERY

With 69.2% of sessions under 5 minutes, implement AI-driven recommendations and "Continue Watching" features to reduce channel-surfing and increase session depth.

06

LOYALTY & RETENTION PROGRAMME

Reward high-value users with exclusive benefits. Deploy churn prediction models to proactively engage at-risk accounts before they unsubscribe.

ROADMAP TO GROWTH: DATA-DRIVEN, AUDIENCE-FIRST, CONTENT-LED

PHASE 1: IMMEDIATE

Quick Wins: Launch female-targeted content campaigns and morning sports highlights.

Retention: Deploy "Continue Watching" features to reduce short-session churn.

PHASE 2: SHORT-TERM

Acquisition: Pilot affordable mobile-first tiers for rural provinces (Northern Cape, Free State).

Engagement: Build AI-driven recommendation engine for personalized discovery.

PHASE 3: LONG-TERM

Expansion: Secure additional live sports rights to solidify platform dominance.

Sustainability: Develop a comprehensive youth content strategy with influencer partnerships.

By focusing on audience expansion, geographic penetration, and engagement depth, BrightTV is positioned to exceed its subscription growth targets for FY2026.
